## Photograph/Videotape Permission

Dear Parent:

From time to time school staff records student activities through the use of photography and/or videotape. Generally the resulting material is used internally to serve as a form of documentation of school/student activity and as a learning tool for both students and faculty. On occasion photographs and/or videotapes may be used for advertising purposes to promote enrollment at our school or as a backdrop to employment recruitment efforts.

In order for the school to produce materials for both internal and external uses we need your permission to use photo and/or video images of your child. Please put a check in the appropriate box and sign below to indicate your preference of permission for the following:

1. I **(do)**  give permission for my child to be photographed/videotaped and the resulting photographs/videotape to be used and displayed within the school as well as, to be used for public display and/or published for the benefit of the school.
2. I **(do not)**  give permission for my child to be photographed/videotaped and the photographs/videotape to be publicly displayed and/or published.

*Please Note: There is no payment or any other form of compensation for use of your child's image if a photograph and/or video image of your child is used either internally or externally as explained in the examples above.*

# PARENT & ATHLETE CONCUSSION INFORMATION SHEET

## WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious.

## WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

## DID YOU KNOW?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

## SYMPTOMS REPORTED BY ATHLETE:

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not "feeling right" or is "feeling down"

## SIGNS OBSERVED BY COACHING STAFF:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can't recall events prior to hit or fall
- Can't recall events after hit or fall

Michigan Department  
of Community Health

Rick Snyder, Governor  
James K. Haveman, Director

▶ **"IT'S BETTER TO MISS ONE GAME  
THAN THE WHOLE SEASON"**

## CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

## WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

## WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.

## Kindergarten Readiness Assessment 2019 Information for Families:

The Michigan Association of Intermediate School Administrators (MAISA), Genesee Intermediate School District, and Grand Blanc Academy are working to improve the way we gather information about kindergarten students at the beginning of the school year. This work is happening in conjunction with several other states, and in partnership with the Johns Hopkins University Center for Technology in Education.

**What is the purpose of the Kindergarten Readiness Assessment (KRA)?** The KRA will help school districts better understand how to gather information about students' skills and behaviors at the start of kindergarten. The results from the KRA will not be used to evaluate your child's performance but can be used by teachers to inform instruction for the entire class.

**When will the Kindergarten Readiness Assessment take place?** The KRA will take place between the beginning of the school year and November 1<sup>st</sup>.

**What will your child be asked to do?** Your child's teacher will lead him/her through a series of activities and questions. The teacher will also observe your child's behavior during the normal daily routine. All activities and questions have been developed specifically for children who are just entering kindergarten.

**How will data be collected and used?** All the information that will be collected about your child will be kept confidential and in a secure location. No identifying information about your child will be shared.

If you have any questions about the Kindergarten Readiness Assessment, please contact Kristina VanGoethem, [kvangoethem@grandblancacademy.org](mailto:kvangoethem@grandblancacademy.org) or 810-953-3140.
